Vesta Polymer Holding Profile

VESTA POLYMER PROFILE

DOC. No. : CT-22-01-01

About Vesta group Holding company:

Vesta polymer Group with the activity scope of supplying, distributing kinds of raw material is experienced, activated in both foreign and domestic markets for about more than two decades in both general and industrial polymers .On this subject Vesta Group has been supplying generic materials to various industries, including automotive, food, cosmetics, electrical & electronic industries, printing & packaging industries, composers and etc.,

In addition, In pursuit of economic prosperity also development of our business activities ,vesta group has co-ordinated it's ambitions with our country's macroeconomic goals which is expanding our activities into the next level to the aim of economic prosperity and job creation.

In this regard since the beginning of 1394 this important was done by our polymers commercial team whom are a group of young, dynamic, and motivated specialists, that have been working on expanding our activities into more industries, such as construction industries & food industry too by producing the nylon products, and shrink-nylon into the production lines.

About Factory

Vesta Polymer Factory was launched by Vesta Group in the year ۲۰۱۶ to contribute the positive development of the country's manufacturing cycle in Alborz province. Initially, after many years of trading experience in the field of polymer materials, the main motive arose from the sense of responsibility of investors and their sense of commitment to employment, increasing of net production, and Applying the experience gained over the past two decades in the field of plastic.

The factory, with the help of well-trained staff, qualified equipment and machinery in the line of polyethylene films packaging production, took part in the market, away from the sense of competition, well known as a trusted manufacture at the professional atmosphere with partners and other converters, in the field of distribution and production of various types of polyethylene films has tried to maintain the status and improve the level of customer satisfaction.

Our Factory Values:

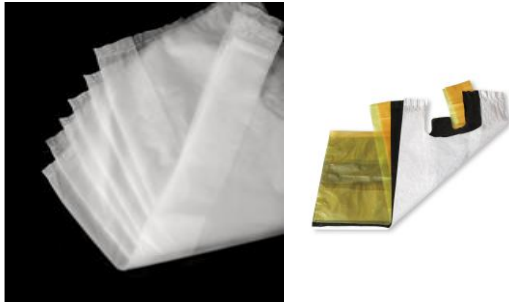

The total value of the products manufactured by Vesta Polymer Co., in year 2017-18 by producing Nylon and Shrink has risen to \$ 20 million.

Our products are:

Various types of polyethylene films like Nylon; Shrink in various types of absorption, Nylon bags and pintables.

1. Nylon

In domestic markets, there are various types of polyethylene films that include a wide portfolio of products in a wide range of users, such as various shrink films and industrial, sanitary, pharmaceutical and food packaging bags.

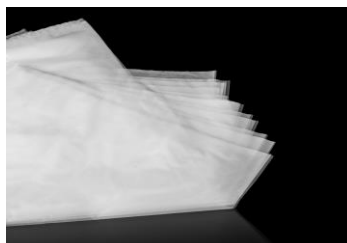

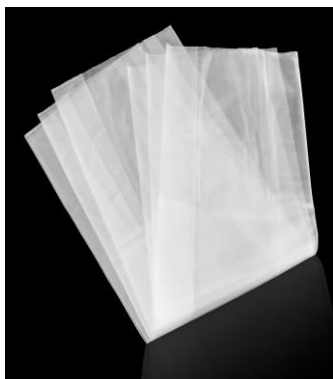

2. Shrink

One of Vesta Polymer products is nylon shrink; which has been produced in in single-layer, three-layer, simple and printed, 20 to 200 centimeters.

3. Nylon bag

Supply of single-layer and three-layer Nylon bags with a width of 20 to 120 cm and a length of 20 to 200 cm in a variety of colorful, transparent and renewable forms with the possibility of printing.

About Vesta Polymer commercial segment:

Vesta Group trading company, has begun its Manufacturing and trading activities in the field of supplying and distributing polymer's all kinds of engineering and public raw materials, since 1996 and has gradually expanded its activities in various industries like: automotive, food, cosmetics, electrical & electronics, printing and packaging, components, etc., and is now one of the extended, Activated trading supplying companies in polymer field.

Our Company Values:

The total value of the materials supplied to customers by Vesta Polymer Co., in year 2017-18 has been risen to \$ 3 million.
